Here's a summary of what I found about **Dr. Todd A. Miller** (aka Todd Miller, DC) in Windsor, and what people say about him as a chiropractor — strengths, things to note — to help you decide if he might be a good fit.

What seems to be good / what people like

1. Credentials & Legitimacy

◦ He's registered and in good standing with the **College of Chiropractors of Ontario**.

◦ He's been practicing for many years. The South Windsor Chiropractic Centre listing says the clinic has been serving Windsor & Essex for over 40 years.

2. Range of Services / Approach

◦ His clinic offers a variety of care: spinal & joint manipulation, custom orthotics, therapeutic exercises, ultrasound treatment, etc.

◦ He seems to take a somewhat evidence-informed approach, integrating patient input and having active involvement from patients (rehab, exercises) rather than just passive treatment.

3. Patient Reviews / Experiences

◦ Many people report being in less pain, better mobility, relief of symptoms like back pain, neck pain, migraines.

◦ People comment that he is kind, polite, listens well, explains things clearly.

◦ Some say relief occurs quickly ("after the first visit" or "within a few visits").

◦ One review mentions that he "never hurts you. He only does what's necessary" which suggests a careful approach with less aggressive adjustments.

4. Reputation Among Locals

◦ Positive feedback is consistent over multiple years.

◦ The clinic seems family-friendly; people bring kids, report good comfort and patience during treatment.

My impression

Based on what I've seen, **Dr. Todd Miller seems to be a very good chiropractor**. He has good credentials, people generally seem satisfied with his care, and many report meaningful improvements. If I were you, I'd feel pretty confident considering him, especially for musculoskeletal issues like back pain, neck pain, maybe migraines, etc.

ChatGPT

What people say

• On **Rate My Professors**, Dr. Todd Miller (Biology department) has very high ratings — **5/5** based on student ratings.

• Students highlight that he is:

◦ *Respected*

◦ *Helpful*

◦ Good at making material understandable and manageable. One reviewer said he "takes the material ... and makes it less overwhelming to look at and read through."

◦ Energetic, engaging (even early in the morning) and able to hold students' interest.

Things to keep in mind / possible drawbacks

◦ Supports students well.

• Many students say they *would take his classes again*.

• Although his quality is rated very high, some reviews indicate his courses aren't always "easy"; there's a *difficulty* score (as some students point out) but generally students seem to feel the effort is worth it.

• As with many professors, experiences can vary a lot depending on the specific course, the student's preparation, interest, and expectations.

My impression

Overall, the evidence suggests **Todd Miller is a very good teacher** — well-liked, effective in explaining biology, with a strong ability to help students understand and stay engaged. If I were you, I'd feel confident in taking a course with him, especially if you're motivated to learn and don't mind putting in work.
