Education

Professional Doctorate Degree

- Doctor of Chiropractic | CMCC Toronto, ON June 1990-94
  Summa Cum Laude | Clinic Honours | Dean's List 1990-94

Bachelor of Science Undergraduate Degree

- Bachelor of Science | University of Windsor 1988-90

Undergraduate Scholarships

- J.M. Wallace Scholarship 1991 | Highest Academic Standing

Graduate Awards

- Ronald King Award, 1994 | Outstanding excellence in clinical diagnostic skills

Professional Licensing

- College of Chiropractors of Ontario, 1994
- Canadian Chiropractic Examining Boards, 1994
- U.S. National Boards, 1993
- Michigan State License, 1998

Employment

South Windsor Chiropractic Clinic
Dr. Todd Miller, DC
July 1994- Present

- Doctor of Chiropractic | Province of Ontario

I have been a primary health care provider in South Windsor for the past 32 years. Our clinic uses a multi-disciplinary evidence-based approach to health care which has proven to be effective in successful case management, health promotion and patient compliance to treatment protocols.

Instructor (Partial Load, Sessional & Part-time)
September 2003 – Present | St. Clair College

Currently teaching courses at St. Clair College in the Biological Sciences field.

- I have had the privilege to teach in the Dental Hygiene, Medical Laboratory Science, Dental Assisting, Pharmacy Tech, Pre-Nursing & Pre–Health programs.
- Courses include Anatomy/Physiology, Biology Level I & II in a classroom and/or lab setting. Medical Terminology I & II e-courses online.
- Acquire and maintain a repertoire of instructional materials and teaching techniques to maximize learning and enhance productivity, i.e. Blackboard Online, Pre & Post lecture teaching strategies which include problem-based learning, post-lecture sample test questioning, lecture flow charting and examination review.
- Promote and facilitate activities that foster the development of critical thinking skills, i.e. group tutorials and current affair discussion.

Instructor
Sept 2000 – August 2002 | Canadian College of Health Science & Technology, Windsor, ON

Taught courses to daytime students in the Registered Massage Therapy program.

- Anatomy/Physiology, Chemistry and Microbiology in a classroom and/or lab setting
- Developed a new course curriculum and manual for the Anatomy/Physiology program
- Held office hours for individual student assistance
- Graded and proctored examinations

Instructor
September 1999 - June 2000 | Canadian College of Massage, Windsor, ON

Taught courses to daytime students in the Registered Massage Therapy program.

- Biology, Chemistry and Anatomy/Physiology in a classroom and/or lab setting
- Held office hours for individual student assistance
- Graded and proctored examinations

Relevant Professional Undergraduate Courses

- Gross Anatomy | 180 Lecture Hours
- Human Dissection | 158 Lab Hours
- Microscopic Anatomy
- Embryology
- Neuroanatomy
- Biochemistry
- Physiology
- Neuroscience I
- Body Mechanics
- Radiographic Anatomy
- Pathology
- Microbiology & Infectious Diseases
- Lab Diagnosis
- Immunology
- Systems Physiology
- Athritides & Trauma
- Neuroscience II

- Bone Pathology
- Neurodiagnosis
- Orthopaedics & Rheumatology
- Diagnosis & Symptomatology
- Lab Diagnosis II
- Toxicology
- Applied Research Design
- Clinical Clerkship
- Clinical Psychology
- Emergency Care
- Community Health
- Clinical Nutrition
- Clinical Lab Clerkship
- Clinical X-Ray Clerkship

Pursuant to the **Post-Secondary Education Choice and Excellence Act,** The Ministry of Training, Colleges and Universities accredit the Canadian chiropractic program (CMCC) as a professional doctorate degree. The chiropractic professional degree program **in Ontario** is comparable to that of other primary health care professions, such as medicine, dentistry, and optometry.

It has also been recognized and validated by the **Ontario Regulated Health Professions Act, 1991**, which only allows medical physicians, chiropractors, dentists, optometrists and psychologists the Controlled Act of communicating a diagnosis and the **legal right to the title doctor.**

IN WITNESS WHEREOF, WE HAVE HEREUNTO SET OUR HANDS THIS

Eighth DAY OF June NINETEEN HUNDRED AND Ninety-four

Teaching

Philosophy

My professional education has stressed certain pre-requisites for initiating the study and application of scientific factual material and I feel there has been a direct relationship between the degree of effort expended during my formal education and the resulting accomplishments noted in my teaching methodology.

My approach to enhancing the learning experience involves the application of prior knowledge and the skills learned from practical experience combined with patience and compassion for student comprehension.

I am truly a life-long learner. My interest has always been in teaching and now my career path has led me to the education system. Over the past twenty-seven years I have been teaching. I have always sought further personal and professional success. I believe that my passion and excitement for education is evident.

Career Experience

Along with my involvement as a health care provider over the past 32 years I have twenty-seven years experience in the Biological Sciences teaching field, six of which have been in a partial load and sessional capacity at St. Clair College in multiple programs (Dental Hygiene, Dental Assistant, Med Lab, Pharm Tech, Pre-Health & Pre-Nursing).

My dedication to St. Clair College has afforded me the distinct privilege to have taught the Biology Level I & II courses an innumerable amount of times. One of the biggest assets I can offer this position is that I have had the unique experience of lecturing in a majority of health-science programs offered at St. Clair College. This has allowed me to diversify my teaching experience, select and use teaching strategies that match the learning environment and learners involved. This ultimately gives me the distinct opportunity to guide students in the preparatory courses based on individual program needs. Lastly, the Department of Continuing Education has given me additional competencies, such as working with a diverse group of non-traditional students that include working adults and internationally trained immigrants. This has allowed me to establish rapport with a variety of learners and identify and support learners "at risk". I believe the Professor of the 21st century needs to contribute to a learning culture that is diverse and ever changing and with these basic tenets in mind, encourage peer support, continuous learning and the use of technology to enhance productivity and help students learn. The axiom of **'Our focus is you'** has never been more aptly timed and suited to such a diverse learning environment and I believe that students would concur that I try to instill that in every one I am privileged to teach.

ST. CLAIR COLLEGE
OF APPLIED ARTS & TECHNOLOGY

Human Resource Department,
St. Clair College,
Windsor, ON

To Whom It May Concern:

I am writing this letter of recommendation on behalf of Dr. Todd Miller. It is my understanding that he is an applicant for the position of Professor of Biology/Chemistry in the School of Liberal Arts & Sciences.

I have had the pleasure of working with Dr. Miller as he taught in the Medical Laboratory Science Diploma Program during the 2003-04, 2004-05 and current 2007-08 academic years. He delivers the Anatomy and Physiology course material for both the fall and winter semesters of the program. His expertise as a health care professional enabled him to adequately prepare our students for the clinical courses in their upcoming semesters. His preparation and presentation of the material was excellent, and the students enjoyed his classes. Students' comments indicated that he made the learning "fun and easy".

Dr. Miller met with me on a regular basis and kept me informed of student progress during each of the semesters. He would confer with me, if he had any concerns about the delivery or content of the material. He understood the role of Anatomy and Physiology required by a Medical Laboratory Technologist, and used that perspective in the classroom.

He has many years of teaching experience, in various programs and his ability to adapt to these teaching roles indicates he would be an asset to the college. I appreciate this opportunity to provide a reference.

Sincerely,

Jan Maxwell

Jan Maxwell,
Professor and Program Coordinator, Medical Laboratory Science

ST. CLAIR COLLEGE
OF APPLIED ARTS & TECHNOLOGY

May 30, 2007

To Whom It May Concern:

I am pleased to provide this letter of recommendation regarding Dr. Todd Miller.

Dr. Miller has been a part-time Biology instructor in the Department of Continuing Education since 2005.

Dr. Miller has consistently been one of our most highly rated instructors. Students have perceived him as a knowledgeable and caring instructor as well as an excellent communicator. It is not uncommon for students to contact us to ask which course sections Dr. Miller will be teaching in subsequent semesters. When they call or visit us, these learners often speak highly of Dr. Miller's subject knowledge as well as his enthusiasm and his special gift for making learning fun. Nonetheless, Dr. Miller takes his instruction, evaluation and assessment responsibilities very seriously, ensuring that students are exiting his course sections with the requisite skills and knowledge.

From an administrative point of view, it has been a pleasure to work with Dr. Miller. Because of his enthusiasm for teaching, he has been willing to accept course assignments on short notice, even accepting the unusual challenge of taking over a course from another instructor in the middle of the Winter 2007 semester. Regardless of the circumstances, Dr. Miller always executes his responsibilities very conscientiously.

If additional information is required, please contact me at (519) 972-2727 ext. 4735. I may also be contacted by e-mail at imoore@stclaircollege.ca.

Sincerely,

Irene Moore, M.A., B.Ed.
Manager, Continuing Education

ST. CLAIR COLLEGE
OF APPLIED ARTS AND TECHNOLOGY

June 4, 2007.

TO WHOM THIS MAY CONCERN:

RE: Dr. Todd Miller

Todd has taught in the Pre-nursing program for several semesters. He is an enthusiastic teacher with a passion for teaching. The students enjoyed his teaching methods and appreciated the knowledge that he presented to them.

He met with me on a regular basis to ensure that he was providing quality education in a suitable fashion and that his standards were adequate for the program.

Todd is a pleasant personality and would be an asset to our program.

Sincerely,

Cheryl Yako

To whom it may concern,

I have known Todd Miller for the past four years at St. Clair College. He is a very enthusiastic teacher who is capable of teaching a wide array of subjects in the biological sciences. He is very thorough and knowledgeable in the subjects that he teaches. I believe that he is genuinely interested in the success of the students. I think he has found his vocation in teaching. With his vast background in the health area, I am sure that he would be an asset to the college. If you have any questions concerning the applicant, please feel free to contact me.

Sincerely,

Prof Bill Lukachuk

Dear Sir/Madam

This reference letter is provided at the written request of Dr. Todd Miller who asked me to serve as a reference on his behalf. It is my understanding that Dr. Miller is applying for a position in your department.

Dr. Miller has been with our program for the last three years, teaching the Physiology and Anatomy course to our dental hygiene and dental assisting students. The student's feedback on his teaching style and communication skills has been very positive. He has an outgoing personality, is very approachable and easy to work with.

In conclusion, I would highly recommend Dr. Miller for the position in your department.

Sincerely,

Max Massad

Commitment to Professional Development

I have accepted every opportunity presented to me over the past thirty-two years since the completion of my formal education. During my time in professional practice, I continuously challenged myself by choosing many professional development programs and presentations that would enhance my skills as a primary health care provider as well as educator. Many of these workshops are interrelated with my pursuit to one day become a full-time teacher in the post-secondary level.

The faculty at St. Clair College I have had the privilege to meet have been a very supportive and cohesive team. Many of the instructors during my term have acted as mentors for me and to this day continue to allow me to use their experience, resources and expertise as a tool in my own professional development.

My commitment to teaching and learning is further demonstrated through my choice of upcoming professional development activities.

Professional Development Training, Courses and Activities

- Biomechanical Gait Assessment and Orthotic Therapy Workshop | Toronto, ON 1995
- Foot Orthotic Seminars | The Orthotic Group | Toronto, ON 1996-98
- Complete Web Site Development SWCC 1998 | www.mnsi.net/~tmiller
- Developed a new course curriculum & manual for Anatomy & Physiology I & II College of Health Science & Technology, Windsor, ON | September 2001
- Developed a course curriculum revision for Pre-Nursing, Biology I & II | St. Clair College | September 2005
- Developed Blackboard Course Online | Medical Laboratory Science | Anatomy & Physiology I BIO 147 | Sept 2007 and Anatomy & Physiology II, BIO 245 | Jan 2008
- Anatomy and Regional Orthopaedic Pathology | Dr. Frank Netter, M.D.
- Shoulder and Upper Arm, Elbow, Wrist & Hand, Cervical, Thoracic & Lumbar Spine, Thorax & Abdomen, Thigh, Knee & Lower Leg, Ankle & Foot | Sept 2010-13.
- Perform proofreading and quality checks of edited Anatomy & Physiology textbook manuscripts & page proofs at all stages of production | August 2009-present
- Developed Blackboard Course Online | Medical Terminology I & II | Sept 2018
- Developed Blackboard Course Online | Pre-Nursing/Pre-Health Biology II | Sept 2021
- Developed Blackboard Course Online | Pre-Nursing/Pre- Health Biology I | May 2022

Professional Presentations

- Workshop presentations on Musculoskeletal conditions in health-science fields at St. Clair College | 2005-present
- Speaker on Back Care Workshops to various health-science programs at St. Clair College | 2003-present
- Formally asked to represent the Biology department presenting sample GAS 11 & 21 course lessons in the Instructor Showcase | St. Clair College 2007

Student Evaluation & Feedback

Recognition of my teaching abilities takes the form of student evaluations/comments, and peer evaluations/letters. Students in the courses that I have taught have responded very well to the learning environment that I try to create. The consistently strong evaluations that I receive from students reflect my commitment and dedication to teaching and the student's satisfaction with my enthusiasm, teaching methodology and strategies. While complete evaluations are on file and available upon request, please feel free to peruse the enclosed feedback which was taken during the period 2003 - 2026 at St. Clair College.

Listed items include:

- **September 2005** Nursing students letter to Stephanie Nagle, Chair, School of Health Sciences.
- **December 2005** Biology students request to Gayle Dale, Interim Chair, School of Arts & Sciences & Cheryl Yako, Co-ordinator, Pre- Health/Pre-Nursing.
- **June 2007** On behalf of Dr. Miller to faculty & administration.
- **July 2007** Student letter to faculty & administration.
- **December 2008** Dental Hygiene students letter to Roger Laplante, Chair, School of Health Sciences.

Collaborative Nursing
H-850 South Campus

September 28, 2005

St. Clair College
School of Health Sciences
Windsor Campus
2000 Talbot Road West,
Windsor, ON N9A 6S4

Attention: Stephanie Nagle, Dept. Chair

Dear Mrs. Nagle:

An assembly of 1st year Collaborative Nursing students have come together and would respectfully like you to consider Dr. Todd Miller as a teacher for any available health science courses throughout our curriculum, i.e. Anatomy, Physiology and Microbiology.

Anatomy (Year 1, Semester 1) Physiology II (Year 1, Semester 2)
Microbiology I (Year 2, Semester 1) Medical Microbiology (Year 2, Semester 2)

Dr. Miller has taught several of the current students from previous years in Pre-Health Nursing and other programs in the Health Science department. Everyone agrees that his teaching style is very effective and organized which makes the learning process much more efficient. We enjoy his presentations of the material being taught and his use of handouts and personal examples compliment his lectures.

His background in the Sciences and as a primary health care provider makes his knowledge considerably more up-to-date and parallels with the following four classes very well. His voice is very clear and concise and his instructions for assignments are introduced without any confusion. All of this in turn will ultimately make us better professionals (Registered Nurses) in the health care field, not only theoretically but also practically.

If you have the time to meet with us before or after a class, we would like to introduce ourselves and discuss these concerns in a respectful manner.

Thank you Mrs. Nagle for your kind consideration in this matter.

Sincerely,

Collaborative Nursing Students (H-850)

Attn: Cheryl Yako
Gale Dale

We, the students of Pre-Nursing, Sections ABCD are requesting that **Dr. Todd Miller** will continue teaching Biology next semester (2). We all enjoy his teaching methods. He is very thorough and he teaches us in a way that is easier than most to learn. Please review this petition and please take into consideration all the names listed below.

On Behalf of Dr. Todd Miller

Re: Professor of Biology position # 07-F-02

June 7, 2007

Dr. John A. Strasser, President
Dr. Peter Tumidajski, Vice President, Academic
Tina Di Simone, Chair, School of Applied Arts & Sciences
Cheryl Yako, Pre-Nursing/Pre-Health Co-ordinator

Dear St. Clair College Administration and Faculty,

All of us have been touched by a recent front page article in the Windsor Star (Saturday June 2nd) regarding an exceptional professor at the University of Windsor that went above and beyond the expected for his students in the classroom. Dr. Todd Miller, currently a Biology instructor at St. Clair College, possesses the very same commendable qualities.

It has come to our attention that a full time position for a professor of biology has recently been posted. Dr. Todd Miller is or has been our instructor in the biological sciences field, specifically in Biology I, Biology II and Anatomy & Physiology. As students, we believe it is very important for a college to not only have qualified instructors, but also instructors who can connect with students and make the learning experience an extremely positive one. A majority of students believe Dr. Miller exemplifies this type of instructor.

We were all fortunate enough to have Todd Miller as an instructor in our programs of study. He is the quite simply the best biology instructor we have ever had at the college or university level. Dr. Miller consistently demonstrates an exceptional ability to not only clearly present the information he is teaching, but more importantly, ensure that the entire class understands what is being taught. He supplies extra material and provides additional reference sources, and has remained after class to assist anyone having difficulty. His extensive rapport with students, combined with high levels of energy, create an environment in which students are more alert, leading to greater potential for students to absorb the material being presented.

Quite simply, we have never experienced this kind of ability or commitment from any other instructor we have had at St. Clair College or the university level. Dr. Miller's in-depth knowledge of biology allows him to clearly explain any questions the class may have and present it to them in a way that was easily understandable. His ability to connect with adult students, who in many cases require a additional assistance, is an exceptional and refreshing change. We strongly believe that to teach in the Biological Sciences field of study, St. Clair College will find no better candidate than Dr. Miller.

It is essential that when taking a health science course, a student gain a solid foundation in that discipline so they have firm knowledge base to carry them further in that field. Dr. Miller has repeatedly proven he has that ability to provide this knowledge base with all manner of students, from high school graduates to adult students. We have spoken with many of his current and former students and are all in agreement with this conclusion.

St. Clair College's motto is **'Our Focus Is You'**, and presumably the '**You'** is referring to us, the student. If this is indeed the case, we believe the college would attempt to hire professors who are already valued, respected and held in high regard by his or her students. We believe the college will hire professors who can better serve the students, educating them and providing intrinsic value for their tuition dollars.

If the motto is indeed true, students are arguably the most important asset to the College -- would it not be wise and prudent to listen to what they wish to say?

We believe that Dr. Miller is an exceptional candidate for the position. These names represent students who believe the appointment of Dr. Miller to professor of Biology will directly benefit the students as well as the reputation and integrity of St. Clair College.

We, the students of St. Clair College, sincerely hope our voices will be heard.

Thank you for your time.

Not only was I lucky enough to have Dr. Todd Miller as a teacher in the Dental Assisting program, I was fortunate to have him as a teacher in the GAS 11 and GAS 11A courses, while upgrading for Dental Hygiene. Dr. Todd Miller's teachings are what kept me focused in Biology, making it an interesting and exciting course, which is not always the easiest thing to do. For that I thank him, and I definitely agree that he should be hired as a Full Time teacher at St. Clair College.

My name is Misty Maurina, I am signing because Dr.Todd Miller is one of the greatest teachers that ever taught. I am currently taking Biology at St. Clair and am in his class. I was in his biology 1st semester class and had him requested for the second. I've never seen or heard any other teacher teach the way he does. He is amazing and for classes that are condensed from 14 weeks to 7...WOW...need I say more??!! It would be an honour for anyone to be taught by him or to have him on staff and teach anyone with a future in his field!!!So...yes I want to sign this petition and I'm sure given the chance to receive this petition everyone else would follow along. Thank You for this opportunity,

Misty Maurina

YES, I AM IN FAVOR OF DR. T. MILLER AS A FULL-TIME INSTRUCTOR FOR THE ANATOMY & PHYSIOLOGY AT ST. CLAIR COLLEGE. ALL I COULD SAY, HE WAS THE BEST INTRUCTOR I EVER HAD. I TOOK THE PRE-REQUESITE BIOLOGY I WITH HIM & I ALMOST GAVE UP. BUT HE TAUGHT US A GREAT WAY. SO I'M GLAD HE WAS MY INSTRUCTOR. I REQUESTED HIM TO BE MY INSTRUCTOR BECAUSE I'M GOING BACK TO SCHOOL THIS SEPT. 2007. I'M OVERWHELMED FOR HIM. I AM SURE SO MANY STUDENTS ARE LOOKING FORWARD FOR DR. T. MILLER.WE ALL NEED HIM FOR THE COLLEGE.

I wish all the best for him. Thanks.

I would like to sign for Dr. T. Miller to get the full time teaching position.
It has been a long time since I've been back to class and before Dr. Miller took over my class, Biology I (Winter), because our last teacher was not teaching the course properly and was asked to stop, I was feeling a little discouraged.

But when Dr. Miller started to teach in such a short period of time, I learned the most from him and it actually stayed in my mind. It made me think that I can handle a full time job, be a single mom, pay a mortgage and go back to school to further my career. I really enjoy being in Dr Miller's class and look forward to going to his class. He is quite comical and most of all he knows and believes in what he teaches. You can tell by the way he teaches biology, he enjoys it. I hope he does start teaching it full time because it's my goal to become a nurse and I know I'll get more out of his class than just dictation.

Thanks CATHY MARIANI

I, Kira Ann Warhurst would like to sign.

Dr. Miller taught me and honestly his way of teaching is amazing. He explains biology in way that no matter who you are, you understand it fully. I'm taking Biology 2 right now at the college and I would die to have him teach me. The person who is teaching me now is very dry and uninteresting. With Dr.Miller he is always actively involved in his teaching. It would be a great loss to the administration not to have him as a full-time teacher.

Thank you for your time. Kira

My name is Gillian Lloyd-Boyle and I enrolled in Biology 1 (GAS 11) during the winter semester and was completely "wowed" by the exceptional ability of Dr. Miller, the exceptional responsiveness to the students directed by Dr. Miller, the exceptional quality of teaching by Dr. Miller (better than I have ever experienced and I have attended & graduated from the U of W not to mention a business college as well), the drive Dr. Miller has in him to want his students to not just achieve good grades but to understand that we all have the ability to excel and do well if we learn how to apply ourselves and study smartly. He is a confidence builder and I have never met an individual who wants so much for his students and he puts himself out there and avail himself if any help is needed even when you're no longer in his classes. I have passed on my comments to the faculty at St. Clair College and would love to express myself again and would be very interested in signing.

I would love if he were a full time faculty member @ St. Clair and I hope that he would teach more than just introductory courses if that is humanly possible.

Sincerely,

Gillian Lloyd-Boyle

Dr. Todd Miller is the best teacher I have had the privilege to be taught by. As a student that is not an academic learner, I cannot tell you how much of a relief it was being in Dr. Miller's class and not feeling intimidated. He explained things in such a way that made the curriculum seem more real. He teaches in such a way that makes you feel like you are on the same level as he is, which is rare. In a perfect world, I'd have Dr. Miller teach the teachers how to teach!!

Sincerely,

Lynn Zugcic

July 4, 2007

Attention:

Dr. John A. Strasser, President of St. Clair College.
Dr. Peter Tumidajski, Vice President, Academic
Ms. Tina DiSimone, Chair, School of Applied Arts & Sciences.
Ms. Sandra Webster, Director, Human Resources
Ms. Cheryl-Lou Yako, Pre-Nursing/Pre-Health Co-ordinator

Dear Dr. Strasser, Dr. Tumidajski, Ms. Di Simone, Ms. Webster and Ms. Yako:

Dr. Todd Miller exemplifies qualities that any post-secondary institution should be eager and proud to incorporate into their full-time faculty. Dr. Miller is a life learner and his enthusiasm is very contagious. When I heard that there was an opportunity for him to be a full-time faculty member, I thought to myself what a valuable resource St. Clair College will gain. I would kindly request that you at least review why it is that I think Dr. Todd Miller is an exceptional teacher and mentor; I know my thoughts and sentiment are shared by many other students. Dr. Miller is not the average teacher, he is an exceptional teacher.

Dr. Miller is very dedicated to his students and to their learning experience and this dedication is abundantly apparent when you take a course with him. From the first week of class, Dr. Miller made it a point to remember his students, if not by name, at least by face and treated students as individuals and not just as a number. He also, in the first week of class, made it his mission to obtain a multi-media room in order to provide his students with the best learning environment and Power Point resources. Dr. Miller very directly outlined his expectations in the course and imparted the importance of effective study habits. Dr. Miller exercised responsibility to his students beyond the call of duty in not only imparting the importance of effective study habits but clearly and repeatedly explaining how to study effectively. He did this by actually sharing methods on how to flow chart the various subject material to make learning more manageable and most effective. In effect, Dr. Miller shared with his students a valuable learning tool to be incorporated into the self study process that will help us in our future endeavours. In addition to this, Dr. Miller provides supplemental learning resources throughout his course.

Dr. Miller is very determined in his effort to establish the ground work so that every student has the ability to succeed and realize their full potential. He is a motivator and is constantly encouraging students to not give up but to find their confidence in learning. He took the intimidation out of voluminous text books and puts learning into perspective. Dr. Todd Miller avails himself to his students after class and by

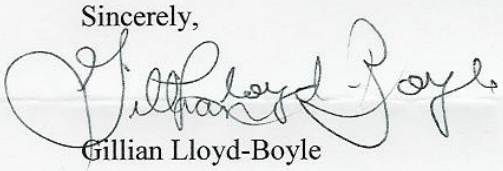
email for any questions or problems you might have. He keeps an "open door" policy even into the future when you are no longer his student, if there is any question concerning your studies that you might have a problem with or require clarification on. In effect, Dr. Miller invests in each student he encounters because he gets you to see the potential within yourself and challenges you to actively learn and comprehend the material.

Dr. Miller challenges his students to take responsibility for our actions and to develop a social conscience by consistently raising our awareness about such things as scientific facts, health issues, ethical issues, moral responsibility just to name a few. For instance, he would in a very matter of fact manner state the biological impacts of smoking on overall health or the consequences of metabolic steroid use or the importance of listening and being there for your child rather than putting a child on medication to modify behaviours. What I gained from that was the following: don't take the easy way out, do the work, put in the effort, listen to on another, advocate for those that matter to you, take the time to care, invest in your fellow human being.

Dr. Todd Miller consistently promoted St. Clair College as an optimal learning environment concerning a choice I was contemplating regarding study options. He is very loyal and deserves the same regard.

In all my years of school: grade school, secondary school, university and both private and community college, not to mention education through the insurance institute, I have never encountered such quality teaching as I have with Dr. Todd Miller. I can certainly think of some good teachers I've had but not on the same level as Dr. Miller. He selflessly extends himself to his students and offers unconditional support. He shares his skill of learning and strengths with others in the hope that others succeed. He practices solid personal standards and high ethics and his "down to earth" personality and great sense of humour commands respect from his students.

Sincerely,



Gillian Lloyd-Boyle

December 1, 2008

Attn: Roger Laplante

We, the students of Dental Hygiene year one, are requesting to have Dr. Todd Miller teach our DTL 262 course this coming semester, semester two. Dr. Miller is currently teaching us the DTL 162 course, Anatomy and Physiology 1, theory only, this semester.

Having separate professors for both theory and lab classes has made it difficult for us to bring what we have learned, from both classes, together. Different teaching styles and schedules for topics do not allow us to be taught the same things in both classes. It is almost impractical to expect two busy professors to be able to perfectly connect lab and theory lessons. Having only one professor teach both lab and theory would make it much simpler for the professor, allowing them to be sure we are taught everything that we are required to know. It would also allow a much more structured environment for us, the students, because everything taught would be connected to both classes and, therefore, better explained.

Dr. Miller's Anatomy and Physiology class this semester has been extremely educational. His different teaching styles and unique way of explaining things has allowed us to excel in this course. He is very talented in his methods and not only keeps our attention, but makes us extremely interested in the material he is presenting. Many things that we were required to know for our lab were explained in his course and he often gave us a much better understanding of the material. Allowing us the best resources, including professors, directly benefits us as students as well as the college in reputation and integrity.

We hope that you will carefully look over the following signatures and comments and take our petition into serious consideration for our upcoming semester.

Hi Dr. Todd:

Thank you again for a great learning experience. I never took science courses in high school, steering clear of them. Then, in University, the closest I got to science was political science and that is a scary kind of science, studying the minds and rationales of politicians and the seams that bind society together. Right out of a horror flick!

I ventured to take Chemistry back in 2000 through the Adult Learning Centre prior to having my kids and I did quite well in the course though the teaching of the course left something to be desired.

Your enthusiasm for the sciences and for continued learning is very contagious and I thank you for the very valuable learning tools that you have shown us and shared with us. You take the intimidation out of studying and put the voluminous amounts of study material into some kind of manageable perspective. You also motivate your students and keep them in the positive!

Again, the way that you showed us how to study and how to breakdown the subject material and to flow chart the material will pay dividends in years to come when I will one day study Massage Therapy and I will definitely incorporate this study technique for all future learning.

I can't thank you enough and I really hope to get you for GAS 21 in spring or fall.

Sincerely, Jill Lloyd-Boyle

Subject: RE: Gas 11: Thanks guys,

Hey Todd,

I would like to thank you for your obvious dedication and enthusiasm for teaching. It was a pleasure to be in your classroom. Although, you set the standards pretty high for others! I have to admit I was quite intimidated at the beginning, as it was the first time I had ever taken a biology course. I found several components helpful such as your ability to simplify information, incorporate humour, and your unmistakable knowledge of the material. The accessibility to your blackboard notes and study sheets were also beneficial.

I have to say I am thankful that I had you for GAS11 rather than my current GAS21 teacher, because I honestly don't think I would have pursued the course any further.

So the synopsis is that you were great!

Take care, Dana

Hi Todd,

I am in the midst of possibly/hoping to transfer to your Gas 21 course in the spring over the 14 weeks, as opposed to continuing on with the fast tracked pace.

I really want you to continue teaching the A & P. Like I said to you before, in all my years of university/college sciences, you have by far in a class of your own taught it the best! I MEAN IT!!!

Hi Todd, I just want to let you know that I really enjoyed your class. Youkept me very motivated and I was never bored sitting there, you are an excellent speaker.

I would like to know what my mark was on my final test if you don't mind and I can figure out my average. Overall everything was great.

Hope to get you next semester! Have a Very Merry Christmas and a great start to the New Year.

Subject: a quick thank you

I just wanted to tell you that I haven't taken biology since 1989 (grade 9), and 1995 (Environmental biology - I totally hated and blew off). This is my first college course since 1995.

I was very nervous to take this course, and chemistry coming up next semester. I've been a restaurant manager for 8+ years, and I'm a mom to an 11 year old, 10 year old and 18 month old.

I have taken a leap of faith to try to get into the nursing program...and since beginning your course, I feel like I made the right decision.

YOU have made this fascinating for me.

So, thank you so much.....

Hi Sir

Honestly I really enjoyed being in your class, you are one of those professor's that I would take any course without doubting. As I can remember the few times I send you an email you always responded right away, thank you, as well every class that I went to you always try to put the material very simple to us, you didn't like confusing us, you would show as a way to remember things, that help me out a lot.

I wish you and your family a Merry Christmas as well many blessing in the New Year.

Hi Dr. Todd,

I definitely enjoyed your class, both semesters in fact. What I enjoyed just about everything about the course, it's interesting to learn about the human body and what does what.

I really liked the way you teach the course as well, the fact that you actually teach it to us and not just read the book and learn it, it really makes it much more easier when you throw out tips on how to remember certain things, the way the text book should be read, and the fact that you point out major concepts we should understand.

I personally enjoyed the way you teach, and I must say as well as others. Their is no possible thing I can think of about really strengthening the way you teach to others, you really completed that task.

One of the best teachers I have ever had, it was a pleasure.

Take care and have a great summer!

Hey Todd,

Loved the lectures for Anatomy and Physiology. You have a great way of breaking down the information in a simple clear and concise way that is easily understood.

You make the class fun and interesting and made me want to attend the lectures every week. It is very easy to learn from someone who is enthusiastic about not only teaching but about their profession.

Thanks for making the class enjoyable and easy to understand.

Hello Dr. Miller,

I am honoured to have had you as a teacher. I really appreciate the way you taught us how to learn.

Your teaching style was methodical and presented the information in such a way that each lecture was the foundation for the next lecture. This was very important given the limited time we have. The course covered a lot of information, but you were able to teach us and the results are self evident.

Thank you for taking the time to answer our questions during the lectures. I would like to have your way to teach as for the other courses too...

I greatly appreciated and enjoyed being taught by you in the Med Lab A & P course. I felt that you presented the material and taught it properly to students in a way we could understand and quickly pick up, and not as some professors who may assume the class already knows the material and rush on in lectures, or continue through power points talking and not teaching.

You showed genuine kindness and care for the students and concern that we may properly know the material. I really appreciate how you focused on what was important and put proper emphasis on important material so that there was no surprises on the tests. Also, your flow charts and diagrams were a great help and can be used for future A & P courses.

All in all, please keep up the good work! I can honestly say that you were one of my best teachers, & this A & P course has peaked my interest that much more into anatomy and the pursuit of a career in the medical field.

Sincerely, Bosko Jugovic,
Medical Laboratory Science Year 1

To: Patricia France, **President St. Clair College**
Subject: Concern

I am a St. Clair College nursing student. I have gone back and forth in my mind for months contemplating on writing this email. As that being said I would prefer to remain anonymous. A few months ago I emailed my old biology teacher Dr. Todd Miller to thank him for being such a great teacher and how grateful I was for the lectures that were both detailed but also for his teaching techniques. He went above and beyond to make students understand the material. Going to another Anatomy & Physiology class last semester I was prepared for it to be more complicated and was mentally prepared that no other teacher would be as great of a teacher like Dr. Miller. But what a difference, you go from him, a teacher who reads draws and by the end of a class he is covered in chalk to a professor who has no enthusiasm, makes us all nervous by her pacing and just reads repeats of slides.

Every student learns differently and every teacher teaches differently and not having different options leaves everyone scared and tense not to get on professor's bad side, exactly why I said I would prefer my name not to come out. I have voiced my concern about this with professors that I trust and respect from current classes and also from the past. I understand that not my one email will make a change but I also feel that it is time someone takes action. I know I am not the only one to feel this way, I have heard complaints from students that are now at the university, students in second year and many current.

I believe that having a full time teaching job at St. Clair College is a privilege, there are so many others who would die for an opportunity like that. There are also teachers who would help students. I took Biology 1 & 2 with Dr. Miller and to this day I can say he is the best teacher I have ever had. I was so grateful to have saved all of his diagrams and notes that I was flipping back and forth from while studying Anatomy & Physiology.

In all this said I have some great teachers this year as well such as Ashley Bulley who is the female version of Dr. Miller with her upbeat personality, and charisma. With teachers like these, students can go from feeling down and like failures to feeling like we can achieve anything because of positive thinking.

Thank you.
